Main findings	1
1. Introduction	3
2. General developments in 2005	4
2.1. Employment and unemployment performance	4
2.2. Monitoring the remaining gap with the Lisbon employment targets	10
3. Employment developments and economic growth	18
3.1. The responsiveness of employment to economic growth	18
3.2. The contribution of employment and labour productivity to GDP growth	21
3.3. Employment prospects in coming years	22
4. Modelling recent employment developments in the euro area	27
4.1. Modelling employment growth in the euro area	27
4.2. Analysing the resilience of employment in the recent slowdown	27
4.3. Employment outlook for 2006 and 2007	31
5. Wage developments	33
5.1. The euro area	33
5.1.1. Developments in nominal labour costs	33
5.1.2. Assessment of the impact of labour costs developments	47
5.2. Catch-up countries outside the euro area	53
5.2.1. Aggregate developments	55
5.2.2. Catch-up growth and sectoral wage developments	58
5.3. Other countries outside the euro area: Denmark, Sweden and the UK	60
5.4. Overall assessment and outlook	63
6. Special issue: Labour market adjustment in the euro area	65
6.1. Introduction	65
6.2. A review of the issues discussed in the economic literature	66
6.3. The nature of differentials in output growth and labour market performances	70
6.4. The role of initial conditions on labour markets	76
6.5. Wage adjustment in the euro area	85
6.6. Conclusions	110

Annex 1 — Supplementary analysis on labour market adjustment in the euro area	113
Annex 1.1 Growth differentials in a growth accounting framework	113
Annex 1.2 Structural change as a source of productivity growth	115
Annex 1.3 The persistence of employment growth	118
Annex 1.4 How closely is employment in services related to employment in manufacturing?	120
Annex 1.5 Structural change and the reallocation of employment	123
Annex 1.6 Tables and graphs	125
References	129
Annex 2 — Decomposing changes in employment rates: taking account of the population effect and participation rate effect	133
Statistical annex	137

Tables

1:	Labour market indicators	4
2:	Employment growth — contribution by gender and age groups (in %)	7
3:	Employment rate and participation rate contribution to changes by gender and age groups	8
4:	Decomposing changes in the unemployment rate in 2005	11
5:	Lisbon employment targets: required job performance	12
6:	Employment growth rate used in the simulation	15
7:	Employment rates in 2010, alternative simulation	16
8:	Job-intensity of growth (elasticity of employment to growth)	20
9:	GDP growth and its sources in 2005	22
10:	GDP growth and its sources –1997-2004	23
11:	Commission's forecasts (Autumn 2005 and Spring 2006)	26
12:	OLS estimates of employment equations with and without break over 1970Q1-2005Q4	28
13:	Total tax wedge on labour (including soc. sec. employers)	40
14:	Tax wedge on labour for the average-wage worker and its components	41
15:	Tax wedge on labour for the low-wage worker (67 % of APW) and its components	42
16:	Compensation per employee	48
17:	Real unit labour costs	53
18:	Country specific performance relative to euro area	72
19:	Country specific performance relative to euro area: selected trend variables	73
20:	Sectoral composition of employment 1996-2003	84
21:	Elasticities of wages with respect to prices, productivity and unemployment in the economic literature	92
22:	Dispersion of the level of unit labour costs and its determinants, euro area Member States	97
23:	Correlation of annual sectoral labour costs growth with labour costs growth in manufacturing, 1996-2004	104

21:	Contribution of non-wage labour costs to total wage growth 2005, euro area Member States	39
22:	Wage growth in the euro area, ex DE, EL and IE	44
23:	Acceleration in wage growth, euro area Member States	44
24:	Convergence of hourly labour cost growth across Member States	45
25:	Convergence of per person labour cost growth across Member States	46
26:	Compensation per employee, range and standard deviation among euro area Member States	46
27:	Compensation per hour, range and standard deviation among euro area Member States	47
28:	Ranking of Member States in terms of wage growth, 1999-2005	49
29:	Real wage growth with different price deflators, euro area	49
30:	Real wage growth 2005 with different deflators, euro area Member States	50
31:	Real private consumption growth and increase of the real wage bill 2005, euro area Member States .	50
32:	Real private consumption growth and increase of the real wage per employee 2005, euro area Member States	51
33:	Contribution to the increase of gross disposable income, euro area	51
34:	Composition of gross disposable income 2005, euro area	52
35:	Real unit labour costs, euro area	54
36:	Nominal unit labour costs, euro area	54
37:	Nominal unit labour costs in Member States, 2005	55
38:	Unit labour costs in the new Member States, 2005	56
39:	Real unit labour costs in the new Member States, 2005	57

40:	Change in nominal wage growth in the new Member States, 2005	57
41:	Change in the growth of nominal unit labour costs in the new Member States, 2005	58
42:	Nominal wage growth in the new Member States, 2004 and acceleration 2005	59
43:	Growth of nominal unit labour costs in the new Member States, 2004 and acceleration 2005	59
44:	Contribution of non-wage labour costs to the increase of labour costs, catch-up countries	60
45:	Correlation between wage growth in manufacturing and services in the new Member States, 1999-2005	61
46:	Wedge between the increase in nominal unit labour costs in services and manufacturing in the new Member States, 1999-2004	61
47:	Nominal wage growth (compensation per employee) in Denmark, Sweden and the UK	62
48:	Increase in real unit labour costs in Denmark, Sweden and the UK	62
49:	Nominal unit costs growth and inflation 2001-05	63
50:	Real unit labour costs growth and change in the employment rate 2001-05	64
51:	Dispersion of GDP growth across euro area countries	74
52:	Contribution to variance of GDP growth for EUR-10	74
53:	Ranking of employment and output performance	75
54:	Output and employment clusters 1996-2005	76
55:	Output and employment performance in the cyclical upswing 1996-2000	77
56:	Output and employment performance in the economic slowdown 2001-2005	77
57:	International trends in participation rates	79
58:	Contribution to changes in participation rates 1996-2004	80
59:	Convergence of employment rates 1996-2004	80
60:	Convergence of female employment rates 1996-2004	81
61:	Contribution of male and female employment to employment growth 1996-2004	81
62:	Convergence of unemployment rates	82
63:	Sectoral breakdown of employment in the euro area 2003	82
64:	Change in the sectoral breakdown in the euro area 1996-2003	83
65:	Actual and hypothetical employment growth if the sectoral composition in 1996 had been the same as in the euro area, average 1996-2003	84
66:	Breakdown of sectoral composition effect	85
67:	Initial wage levels in the euro area Member States 1996	86
68:	Initial wage and labour productivity levels in the euro area Member States 1996	86
69:	Relative unit labour cost levels in the euro area Member States 1996	87
70:	Relative unit labour cost levels 1996 and employment growth in the euro area Member States 1996-2005	87
71:	Ranking of employment and wage growth	89
72:	Wage and employment growth 1996-2005	89
73:	Nominal wage growth in boom and slump	90
74:	Nominal unit labour costs growth in boom and slump	90
75:	Real wage growth in boom and slump	91
76:	Real unit labour costs growth in boom and slump	91
77:	Elasticity with respect to unemployment according to different specifications	93

78:	Elasticity with respect to productivity according to different specifications	93
79:	Convergence in hourly compensation	94
80:	Convergence in compensation per employee	95
81:	Convergence in nominal unit labour costs (adjusted for differences in prices of goods and services) .	95
82:	Convergence in nominal unit labour costs (adjusted for differences in goods prices)	96
83:	Convergence in relative nominal unit labour costs (adjusted for differences in prices of goods and services)	96
84:	Response of employment to a real wage shock, results from 4 different estimates	98
85:	Response of employment to a real GDP shock, results from 4 different estimates	98
86:	Unit labour costs in manufacturing and export growth, average growth rates 1996-2005	100
87:	Unit labour costs in the total economy and export growth, average growth rates 1996-2005	100
88:	Unit labour costs in the total economy and in manufacturing	101
89:	Labour costs and employment in manufacturing average 2001-2005	101
90:	Decomposition of output in manufacturing and export growth, average 1996-2005	102
91:	Average wage growth in manufacturing and services, compensation per employee, 1997-2004	103
92:	Average wage growth in manufacturing and market services, hourly labour costs, 1997-2004	103
93:	Growth of labour costs and labour productivity in services relative to manufacturing, 1996-2004 . . .	105
94:	Average change in nominal unit labour costs in services relative to manufacturing, 1996-2004	105
95:	Growth of hourly labour costs in services relative to manufacturing and change in the employment share of services, 1996-2004	107
96:	Growth of unit labour costs in services relative to manufacturing and change in the employment share of services, 1996-2004	107
97:	Growth of relative unit labour costs in services relative to manufacturing and change in the employment share of services, euro area 1996-2003	108
98:	Coefficient of correlation between growth of unit labour costs in services relative to manufacturing and change in the employment share of services, Member States 1996-2004	108
99:	Growth of labour costs and initial relative unit labour costs in services, 1996-2004	109
100:	Growth of relative real labour costs and change in the employment share of services, 1996-2004 . . .	109
